APRIL 2025

[Cancelled – security issues in Mexico]

[Birding Tour]; *'Finest Birding Route in North America'* – CENTRAL MEXICO - 450 SPECIES FOR THE ROUTE - 60 MEXICAN ENDEMICS

Route includes: [1] West Mexican Pacific slope, [2] Sierra Madre del Sur de Guerrero, [3] Balsas River drainage, and [4] Transvolcanic Belt.

Open-Birding Tour [Style – C] - This a focused 'BIRDERS ROUTE'...

Style and Structure of Tour Planning: 2023 - 2025

[1] **BIRDING TOURS [B & C]** Participation is **open** on a first-come-first-serve basis. Tours in this style repeat a daily pattern of searching-out target species, and are best characterized as a *'birding as the primary-focus'* experience. The difference between [B] and [C] is that B-type programs are less intense, and offered by Legacy Tours in countries where the pace can be managed more easily, while C-type programs are primarily in Mexico, and focus on how many species can be seen in the time period we have allowable -- focused birding for key species!

[2] **FAR-AWAY BIRDING TOURS [A & B]** - are conducted in countries with a *'manageable'* bird-list – Georgia/Armenia, various islands of the Caribbean, Spain, Taiwan, Sri Lanka, and Mexico's Yucatan Peninsula. *Birding is the primary focus of these tours*, though some daily programs, without the loss of key targets or limited range species, may include either historical or cultural interactions.

[3] **HERITAGE-STYLE BIRDING TOURS [A]** - are conducted in those countries where there are just enough birds of interest (island endemics, limited range species, etc.) while the nation itself has a unique and inviting personality. We consider Portugal (and its two Atlantic Islands), the Mediterranean islands of Corsica & Sardinia (two endemics), Scotland & Ireland, and the wintering crush of Monarch Butterflies in Mexico as examples of Heritage-Style destinations. *Though a valuable aspect of these tours, birding shares the spotlight within daily programs that also incorporate activities of a cultural and/or historical nature.*
